

Profile

AlienWiz started in Jan 2001 at Porvorim, with an objective to provide software and allied services to foreign markets at reasonable rates. The low infrastructure costs in India help to keep rates affordable while the tourist atmosphere and lifestyle in Goa help to better understand the requirements of foreign customers.

Alien as in Foreign, Wiz as in Expert (no, we have no connection with the X-Files.) Initially started as a one-man freelance consulting service, AlienWiz has progressed rapidly and today consists of a team of dedicated professionals managed by the original AlienWiz, Mario Alvares. After graduating from Goa University, and completing his formal IT education and training from NIIT(Bangalore), Mario gained industry experience while working at Online Productivity Solutions(Goa) as a developer and team leader. Successful completion of numerous projects and support from his family encouraged Mario to venture on his own. Mario saw the potential of the internet and decided that it was the right direction to move in. Having numerous contacts abroad, Mario started providing consulting services to prospective takers and that's how it began.

AlienWiz today provides IT solutions in the areas of web scripting & e-commerce integration, domain registration & hosting, software development and web design. We specialise in web development on the robust Linux platform mainly in PHP. Our work includes AngelAV.com, Mettelange.com, HolidayGoa.com, ArtHouse-India.com, DiasporaIndia.com and ParfumsXM.com, to name a few. We have successfully executed projects ranging from simple product promotion websites to complex ecommerce order processing and billing portals. We have also developed intranet software for various organisations including the Dempo Group(Goa). Our association with other IT organisations both in India and abroad help us keep abreast with the latest technologies. Besides commercial development, we enjoy developing and promoting non-profit community websites like the very popular Goenkar.com portal.

If you would like to know why and how our services can benefit you, call up Mon-Fri on 2414817 or email us on service@alienwiz.com. More details available at our website, <http://www.alienwiz.com>.

Services Offered

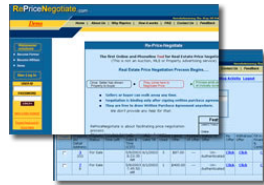

- Website Scripting & E-Commerce Integration
- Website Design
- Domain Name Registration & Hosting
- Software Development

Website Scripting & E-Commerce Integration

We specialise in development of dynamic data driven websites in PHP. Our main development platform is Linux. We also develop websites in ASP for our clients hosted on NT servers. We have worked with a large variety of payment gateways and have provided e-commerce integration services to a majority of our customers.

Colfax Laboratories Pvt. Ltd. (Goa, India)

A complete online catalog and website content management system was developed for the company to promote & sell their wide range of products nation wide. Visit <http://www.parfumsxm.com>

Reprice Negotiate (NY, USA)

A complex multi-website Application Service Provider application was developed in record time. The application also features a transparent API interface to interact with the system.

RubberDuck (Denmark)

A complete content management system was designed to allow easy modification and complete control of the website. Visit <http://www.rubberduck.biz>

Angel Audio Video (Goa, India)

Development of a custom shopping cart system for selling audio cassettes and CD's online. The site also features a forum and artist gallery. Later additions to the website include an online music webzine. Visit: <http://angelav.com>

Website Design

A picture is worth a thousand words (or more). We maintain a large collection of professionally designed website templates and customise designs for our customers. Both HTML and FLASH designs are frequently used.

Cosme Matias Menezes Group (Goa, India)

A complete interactive CD presentation was prepared using FLASH. The presentation, in the form of a flip-book, covered the company profile and history as well as a catalog of their products.

Diaspora Infotec Pvt. Ltd. (Goa, India)

A dynamic and professional website was designed for the company. It was designed for ease of navigation and use.

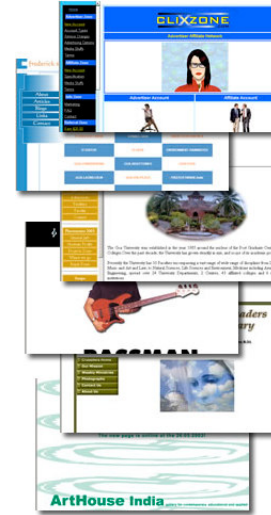

Mette Lange Architects (Preasto, Denmark)

An elegant and professional design for this architect profile. A uniform and simple navigation style makes the website a very pleasant one. Visit <http://www.mettelange.com>

Domain Name Registration & Hosting

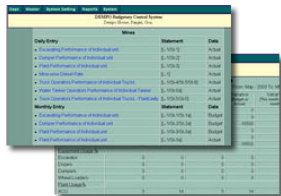

We provide virtual hosting on our Linux server supporting PHP, Perl, MySQL and a feature rich CPanel administration interface. Our hosting packages range from the small economy 10MB to larger corporate 350MB. Custom packages especially for corporate email hosting are also offered. We register .com, .net, .org, .biz & .info domain name. More details and package comparisons and pricing are available at <http://www.alienwebhost.com>

Software Development

Custom application development for in-house business applications is a vital requirement for many of our customers. We provide desktop software development services as well as intranet software application development. Either browser based platform independent intranet applications or standard multi-user client-server GUI desktop interfaces can be developed to suit the needs.

Dempo Group (Goa, India)

A complete budgetary control system was developed to run on the company WAN from the headquarters to distant mining locations. The platform independent system boasts of a robust postgresql database server and a powerful linux application server.

Goa DESC (Goa, India)

The quick archival and categorisation of thousands of articles and newspaper clippings was made possible with the development of a custom data entry and classification software. It also features a web-sync module to update an online database with the latest changes. Visit <http://www.goadesc.org>

Patil MLM (Goa, India)

A highly complex MLM member structure was simplified with automation of all the activities of the company from member registration to accounting & billing.
